

YUSUF SEMIH UCA

UNITY GAME DEVELOPER | SOUND ENGINEER

Unity developer and sound engineer with 7 years of
professional audio experience. Building gameplay systems,
physics-based mechanics, and interactive audio experiences
with Unity, C#, and FMOD.

TECHNICAL SKILLS

- Game Engines: Unity, C# (Gameplay Programming & Audio Programming)
- Audio Middleware: FMOD Studio (Implementation & Event Design)
- DAW & Production: Reaper, Cubase (Mix & Master), Logic ProX (Post-Production)
- System Engineering: L-Acoustics Soundvision (Acoustic Modeling, Phase & Delay Optimization)
- Digital Consoles: DiGiCo (SD Series), Yamaha (CL , DM), Allen & Heath Avantis, Soundcraft VI, Midas M32

GAME & AUDIO PROJECTS

- **RogueLite Demo | Unity / C# Gameplay Prototype**
  - Developed a gameplay prototype in Unity using C#, implementing player movement, combat, abilities, progression systems, and basic enemy AI.
  - Built state-based movement and combat systems, including attack states, combo logic, hit detection, hit reactions, and player movement states.
  - Implemented data-driven skills and perk systems using ScriptableObjects, along with Unity Input System event handling and runtime UI feedback.
- **16barlogic | Interactive Music System**
  - Designed and implemented a logic-based interactive music architecture using Unity and FMOD Studio, synchronized with real-time in-game triggers.
- **DSP-Demo | Audio Programming**
  - Developed real-time Digital Signal Processing (DSP) effect chains and custom audio algorithms using C# scripting within Unity.
- **Sound Redesign Portfolio**
  - Crafted original soundscapes and cinematic audio for various gameplay clips, focusing on layering, creature design, and spatial audio implementation.

EXPERIENCE

FREELANCE / TOURING SOUND ENGINEER

2024 - Present

- Managing FOH/Monitor mixes for various concert productions and tours.
- Vega (Monitor), Skapova (Monitor), Rana Türkyılmaz (FOH & Monitor).

SYSTEM DESIGN CONSULTANT | CAPA PERA, ISTANBUL, TR

2025-2026

- Project-Based Installation: Managed the acoustic design and deployment of the L-Acoustics sound system.
- Performed system optimization using Soundvision.

SOUND ENGINEER | DOROCK XL (KADIKOY, TAKSIM FITAS) ISTANBUL, TR

2023 — 2025

- Managed FOH/Monitor mixes for high-density concert operations while optimizing house acoustics and establishing technical safety protocols (limiter thresholds & signal chain) for guest engineers.

SOUND ENGINEER & STUDIO TECHNICIAN (VARIOUS LOCATIONS)

2019 — 2023

- The Wall Performance Hall (Istanbul): Held solo responsibility for total sound system management, tuning, and live FOH mixing.
- Dodo Studio & Logos Sanat: Managed studio recording sessions, instrument lesson tracking, and post-production (editing/mixing) using Logic Pro X and Cubase.
- Volume Alsancak (Izmir): Executed live sound reinforcement and technical stage management for local acts.
